Building an Asset-specific Data Practice

SupTech & RegTech Innovation in Canadian Securities Regulation

Upcoming: A discussion with Anthony DeCristofaro, President & CEO of Qnext Corp.

FROM THE TOP

At the CRTA, we strive to foster Canadian RegTech innovation by offering thought-leading content, discussions among subject-matter experts and the like on topics that are important to our members. For example, we're ramping up to produce a variety of [podcasts](#) in 2021. But we also aim to connect RegTech innovators with the financial institutions that need them. To that end, we started 2021 off with a new quarterly "Virtual Vendor Showcase" webinar series. The inaugural showcase, on January 26, featured [videos](#) presented by five CRTA participants with solutions applicable to the Client Focused Reforms, which come into effect in two phases this year. By all measures it was a success, hopefully resulting in some FIs finding answers to their compliance challenges, and some RegTech firms finding new customers. Our next showcase will centre around Regulatory Change Management. We hope you find them helpful.

CRTA Welcomes New Participants!

Member Spotlight – Arctic Intelligence

Meet Dan Cade - CEO

Tell us a little about your organization.

Arctic Intelligence is a multi-award-winning global RegTech firm that has developed multi-jurisdictional enterprise risk assessment software enabling regulated businesses to better assess, document and manage their financial crime risks. Our vision is to be global leaders helping to raise the bar on financial crime risk management by innovating and transforming financial crime risk assessments in an accessible and affordable way to all. We are very passionate about and committed to providing affordable technology solutions that make it easier for companies to reduce their financial crime risks and adhere to their international compliance obligations.
