FROM THE TOP

Global crises are the 'mother of invention'; pause and consider the ways in which you've had to introduce innovative approaches to conducting business and servicing your clients. For our Association, we've seen explosive growth with a 250%+ increase in the number of organizations that have become part of our Canadian RegTech community during the past year. The Board invests a lot of time listening to RegTech firms, banks and regulatory agencies, and the common thread in these conversations is the desire to trial new methods for creative collaboration. Meeting these expectations requires innovative thinking. We welcome your guidance on ways in which we can support your organization's innovation agenda more effectively; please drop me a line anytime via paul@canadianregtech.ca.

CRTA Welcomes New Participants!

CYBERSTRATEGIEZ

Beyond Controls:

Exploring Cyber Innovation

Myron Mallia-Dare recently led a discussion with AJ Khan of Cyberstrategiez and Phillip LaFrance of Isara on Cyber Innovation. Watch it on our [new Youtube channel!](#)

Meeting NIST Guidelines for Zero Trust Data Access

CRTA participant Qnext summarizes the guidelines provided in NIST Special Publication 800-207 in this informative [blog](#).

Member Spotlight – Flunks

Meet Yves-Gabriel Leboeuf, Co-founder and CEO

Tell us a little about your organization.

Flunks brings open finance to the people and businesses who want it. As such, we are the financial data layer powering the internet. We're trusted by millions of individuals to securely share their financial information from the institutions that hold their accounts to the third-party providers of their choice. We enable businesses to connect to their customers' financial accounts, enrich this data, and utilize it to deliver better digital products. Serving innovators in lending, fintech, regtech, digital banking, asset management and insurance, we're quickly becoming a global leader in financial data connectivity and analytics. [READ MORE](#)
